COLD CALLING TEAMS

Most leads die at the *handoff,* not on the call.

The VA marks it "warm". Acquisitions calls back with no context. The seller starts over, or doesn't pick up.

the 4 rules that fix it →

RULE 1

1

A fixed list of call outcomes.

Not interested | Wrong number | Call back later | Warm | Hot

Picked from a list, never typed. Free text makes reporting impossible.

RULE 2 · REQUIRED BEFORE IT'S PASSED

2

Warm and hot can't be saved without:

1 Timeline to sell

2 Reason for selling

3 Property condition

4 Best callback time

2

Two more for hot:

5 Asking price, if they gave one

6 Who's on title

So acquisitions doesn't book an appointment with the wrong person.

RULE 3

3

A callback rule the CRM enforces.

→ Hot: alert + task due within the hour

→ Warm: task due the same day

→ Late tasks land on a daily list

Pick times your team can keep. Then nobody has to remember.

RULE 4

A 20-minute check every week.

1. Pull each caller's warm and hot leads
2. Compare with what acquisitions found
3. Count missing fields per caller
4. Coach the biggest gap, one thing at a time

STEAL THIS

Which rule is *missing* on your team?

The full checklist with the field table is free, no email needed.
